#### PLACEMENT TEST for the LIFEPAC CURRICULUM

#### Science 700 - 1200

#### Instructions

This test is designed to aid the teacher or parent in proper placement of the student into the LIFEPAC curriculum. It has two sections: the Student Test and the Answer Key.

This is not a timed test and the student should be given an opportunity to answer each question adequately. If the student becomes bogged down and the test seems too difficult, skip to the next section. If the test is still too difficult, this child's academic skill level has been reached and testing may stop. Each test level should take no longer than one hour.

Testing should begin approximately two grade levels below the student's current or just completed grade level. For example, a student entering tenth grade [1000] should begin testing at the eighth grade [800] level. This allows for proper grade level placement as well as identification of any learning gaps that the student may have.

Once the test has been administered, it is ready to be scored. The teacher or parent does all of the scoring. Each section has 10 numbered questions. Each numbered question equals one point. Use the Answer Key to mark all incorrect answers on the Student Test. Next, record the total number of correct answers in the box beneath the LIFEPAC number in the right hand column. When all tests have been graded, transfer the number correct by LIFEPAC to the Student Placement Worksheet on the back page of the Answer Keys. Then add the total number of points per grade level.

| Test      | Level | Test        | Level |
|-----------|-------|-------------|-------|
| 701 - 710 | 7     | 1001 - 1010 | 10    |
| 801 - 810 | 8     | 1101 - 1110 | 11    |
| 901 - 910 | 9     | 1201 - 1210 | 12    |

| 1.         | The standard metric unit of volume is the                                | <u>701</u>                 |
|------------|--|----------------------------|

|  |  |       |     |      |      |   |
|  |  |       |     |      |      |   |
|  |  |       |     |      |      | <u>—</u>  |
|  |  |       |     |      |      | _   |
|  |  |       |     |      |      |   |
| TOTAL<br>SCORE   |  |       |     |      |      |   |
|  |  |       |     | •    |      | ally using the rule that they a <b>Total Score of 70 points</b> |
| This student places  | s at grade                                 | level |     |      |      |   |
| LEARNING GAPS: Learning gaps can be easily identified with the placement test. If a student receives <b>points of 6 or less</b> on any individual test, they have not shown mastery of the skills in that particular LIFEPAC. If desired, these LIFEPACs may be ordered and completed before the student begins their assigned grade level curriculum. |  |       |     |      |      |   |
| Learning gap LIFE  | Learning gap LIFEPACs for this student are |       |     |      |      |   |

It is not unusual for a student to place at more than one level in various subjects when beginning the LIFEPAC curriculum. For example, a student may be placed at 5th level in Bible, math, science, and history & geography but 4th level in language arts. The majority of school time should be concentrated on the areas of lower achievement with the ultimate goal of equal skill mastery in all subjects at the same grade level.
